

Cobalt Limiter Neo Terms of Use

Document language: English

Product version: 0.9.0

Introduction

These Terms of Use (the "Terms") govern your evaluation and trial use of the brickwall limiter plugin **Cobalt Limiter Neo 0.9.0** (the "Software"), distributed by **Synth Studio Neo** (the "Provider").

These Terms are not a formal end-user license agreement for any future Commercial Version. The timing of a commercial release, pricing, licensing or authentication methods, and delivery format are undetermined.

By installing, launching, or using the Software, you ("User") are deemed to have agreed to these Terms. If you do not agree, do not use the Software.

Article 1 (Definitions)

For the purposes of these Terms, the following definitions apply.

1. **Scope of the Software** — The foregoing Cobalt Limiter Neo 0.9.0 includes VST3 and CLAP builds for **Windows 64-bit**, accompanying documentation, and updates. The Software is provided as an in-development evaluation and trial release.
2. **Commercial Version** — A future official release that the Provider may offer for a fee or through other means determined separately. No Commercial Version is available at this time.
3. **User Works** — Music, recordings, mixes, and other works created by the User using the Software.

Article 2 (Status of These Terms)

1. These Terms apply to your use of the Software.
2. If a Commercial Version is offered in the future, its terms of use may be defined separately from these Terms.
3. These Terms do not guarantee that a Commercial Version will be made available for purchase, nor do they guarantee pricing, a release date, or the introduction of authentication.

Article 3 (License Grant)

The Provider grants you a non-exclusive, non-transferable, non-sublicensable, limited license to use the Software only within the scope of these Terms.

This license does not transfer ownership of the Software to you.

Article 4 (Permitted Use)

Subject to these Terms, you may use the Software for the following purposes:

1. Creating, auditioning, and testing music, audio, and related User Works
2. Personal and commercial use of User Works (including recording, distribution, sale, and live performance)
3. Creating backups for private use

Subject to applicable law and third-party rights, you own your User Works. The Provider does not restrict your use of music, recordings, mixes, or similar output created with the Software, whether for personal or commercial purposes.

Rights in the Software itself, GUI, names, documentation, and related materials remain with the Provider.

Article 5 (Prohibited Conduct)

You must not:

1. Redistribute, publicly upload, share, lend, or sublicense the Software or any part of it
2. Copy, modify, translate, or create or publish copies that are substantially identical to the Software without authorization
3. Attempt to circumvent or remove technical restrictions (including time limits)
4. Extract source code, or analyze, decompile, disassemble, or reverse engineer the Software for the purpose of creating a substantially similar copy, except where expressly permitted by applicable law
5. Use the Software for unlawful purposes, infringement of third-party rights, distribution of malware, or other purposes contrary to public policy, morality, or applicable law
6. Use the Software name, logo, screen design, or similar elements in a manner likely to cause confusion without the Provider's permission

Article 6 (Software Limitations)

The Software is subject to the following limitations and notices:

1. It is provided free of charge for evaluation and trial purposes only.
2. On the Demo edition, approximately 15 minutes (900 seconds) after launch, audio output fades out safely and then becomes silent. To continue evaluation, reload the plugin instance or session.
3. A dedicated preset save / export UI is not provided. Retention of settings depends on DAW project saves and the host's plugin state save.
4. Features, specifications, stability, compatibility, and documentation may change without notice.
5. Provision of the Software does not guarantee a Commercial Version, pricing, or feature set.

If additional functional limitations or notices apply, follow the distribution package, bundled documentation, or in-app guidance.

Article 7 (Intellectual Property)

Copyright, trademark, and other intellectual property rights in the Software belong to the Provider or rightful owners. You acquire no rights beyond those expressly granted under these Terms.

Article 8 (Third-Party Software)

The Software is developed using third-party software including JUCE 8. For license terms, copyright notices, and trademark notices relating to third-party software, see the bundled **THIRD_PARTY_NOTICES**.

Article 9 (Disclaimer of Warranties)

The Software is provided "as is."

Except where prohibited by applicable law, the Provider makes no express or implied warranties regarding the Software, including fitness for a particular purpose, uninterrupted operation, compatibility in all environments, correction of defects, or results of use.

The Software is an in-development evaluation and trial release. Before using it in important DAW projects, we recommend backing up project files, audio data, and similar materials.

You are responsible for verifying operation in your environment and backing up your data.

Article 10 (Limitation of Liability)

1. To the maximum extent permitted by applicable law, the Provider is not liable for loss of profits, loss of data, business interruption, indirect damages, special damages, or consequential damages arising from or related to use or inability to use the Software.
2. The foregoing does not apply to liability arising from the Provider's willful misconduct or gross negligence, or to liability that cannot be excluded or limited under applicable law.
3. The Software is provided free of charge. If the Provider is liable in connection with the Software, that liability is limited to the maximum extent permitted by law, except for liability that cannot be excluded or limited under applicable law.

Article 11 (Feedback)

1. You may send feedback such as bug reports, improvement suggestions, or general comments through methods officially announced by the Provider, if any.
2. If you send feedback, the Provider may use it for product improvement, quality enhancement, and specification review.
3. Sending feedback does not entitle you to compensation, consideration, a Commercial Version, or any other benefit.
4. Do not include personal information that is not necessary when sending feedback. The Provider will handle personal information contained in received feedback only to the extent needed to review, improve, or respond regarding the Software.

Article 12 (Support and Updates)

The Provider has no obligation to provide support, maintenance, updates, or feature additions for the Software. The Provider may offer them at its discretion.

The Provider may change, suspend, or discontinue distribution of the Software.

Article 13 (Personal Information)

The Software operates primarily in your local environment. The Provider designs the Software not to collect personal information beyond what is necessary for normal use.

If authentication, crash reporting, usage statistics, or similar features are added in the future, the Provider will disclose that separately.

Article 14 (Termination and Amendment)

1. If you breach these Terms, the Provider may terminate this license. After termination, you must stop using the Software and delete installed copies.
2. The Provider may amend these Terms in response to version updates, changes in delivery format, legal reforms, or similar reasons. Continued use of the Software after amendment constitutes acceptance of the amended Terms.

3. Provisions that should survive termination (including intellectual property, disclaimer of warranties, limitation of liability, and feedback) remain in effect.

Article 15 (Governing Law)

These Terms are governed by and construed in accordance with the laws of Japan.

Any dispute relating to these Terms or the Software shall be resolved in a competent court in Japan, in accordance with applicable law.
